Subject index

A-value 231
Acari 263
Acetylene 1, 42
Acetylene inhibition technique 327
Actinomycetes 255
Added N interaction 99, 103
Aggregate stability 209
Agroforestry woody species 193
Alfisol 193
Ammonia 237
Ammonium 1, 249
Ammonium fixation 99
Ammonium nitrate 327
Ampholytes 163
Andosol 341
Animal manures 175
Animal slurry 327
Ant 115
Aporrectodea 241
Aporrectodea rosea 150
Aporrectodea spp. 119, 127
Aporrectodea trapezoides 150, 169
Apporectodea trapezoides 63
Arid soil restoration 143
ATP 109
Atrazine 89
Available nutrients 37

Bacillus spp. 341
Bacteria 255
Bacterial counts 109
Bamboo savanna 137
Barley cropping 13
Bed ash 279
Beet 27
Benthic molluscs 219
Biocide degradation 334
Biofertiliser 228
Biological variation 80
Bradyrhizobium 231
Bulk density 119
Butachlor 219

Calcium oxalate 255
Cambisol 109
Carbofuran 83, 219
Carbon mineralization 175
Casts 32
Cation activation 216
Chemiluminescence 260
Cicer 132
Clay minerals 27
Coated Calcium Carbide 42
Cocoon 241
Cocoon production 83
Collembola 263
Colonization 63
Coniferous forest 80
Cotton strip 200
Cowpea rhizobia 297
Crop residues 175
Cultivated areas 183
Cyanobacteria 209
Cycloheximide 334

2,4D 89
Dactyladenia barteri 193
Decomposition 19, 49, 200
Dehydrogenase activity 291
Denitrification 1, 42, 71, 327
Dicyandiamide 327
Dimethyl sulphoxide reduction 71
Dispersal 169, 263
Dispersion 127
Dissemination 32, 115
Diurnal variation 245
Drought tolerance 55

Earthworm 115, 150, 169
Earthworm cast 119, 127
Earthworms 63, 200, 241
Earthworms (*Pheretima* sp.) 32
Ectomycorrhizae 143
Eisenia andrei 83
Electrofocusing 163
Enchytraeids 200
Enzymes 71
Epifluorescence microscopy 89
Erythrina poeppigiana 249
Extraction procedure 291
Exudates 285

Fine root 228
Fingerprinting 163
Flooded rice field 245
Fly ash 279
Foliar concentration 150
Food location 241
Forest soils 320
Forming unit 297
Fungi 255
Fusarium oxysporum f. sp. *raphani* 32

Gel filtration 285
Genotype 231
Gleysol 13
Gliricidia sepium 193
Global CO_2 175
Glomus aggregatum 95
Glomus pallidum 95
Glomus spp. 249
Grassland 155, 327
Grassland soils 7
Gray Lowland soil 341
Grazing 155
Growth stage 231
Gut microflora 32

Headspace 260
Heavy metals 71, 200
Hordeum vulgare 285
Host range 297
Humic substances 163
Humification 163
Hyperiodrilus africanus 193

Immobilization 49
Incubation conditions 291
Indole-3-acetic acid 302
Indole-3-ethanol 302
Inoculation 95
Inorganic pyrophosphatase 320
Insecticides 37
Integrated horizontal flux method 237
Interlayer ammonium 27
Interspecific expression 132
Iodo-nitrotetrazolium chloride stain 89
Iodonitrotetrazolium chloride (INT) 291

JRW3 phage 297

K concentration 27
Kidney bean 95

L-tryptophan metabolism 302
*lac*Z fusions 132
Leaching 49
Leucaena leucocephala 193, 228
Life-history traits 263
Litter 19
Litterbag method 49
Lolium perenne 327
Lolium rigidium 311
Luvisols 183

Maize 55
Manure 237
Matric potential 119, 127
Medicago sativa 63
Melanoides spp. 219
Methane emission 245
Microbial activity 49
Microbial biomass 7, 71, 80, 89, 137, 155
Microbial biomass C 13
Microbial respiration 155
Micrometeorology 237
Microorganisms 37
Microscolex 241
Millipede 115
Mineralization-immobilization 334
Mitscherlich equation 311
Moldboard plowing 13
Mollisols 103
Multivariate analyses 183
Mycorrhiza 115

^{15}N 231
N immobilization 99, 103
N mineralization 7, 99, 103, 137, 279
N mineralization potential 13
N volatilization 279
Near-infrared spectrum 80
Nematodes 71, 183, 200
Nif and Fix operons 132
Nitrate 249
Nitric oxide 260
Nitrification 1, 42, 137
Nitrification inhibition 327
Nitrogen fertiliser 219
Nitrogen fixation 37, 231
Nitrogen leaching 7
Nitrogen turnover 27
Nitrous oxide 1
NO 260
N_2O 42, 260

NO_x budget 260
Nodulation 169, 231, 297
Non-calcic brown soils 183
Non-target effects 334
Nostoc muscorum 209
Nutrient pools 137
Nutrient uptake 249

Oak-leaf litter 49
Organic acids 311
Organic carbon 1
Organic manure 241
Organic P 216
Oxalate metabolization 255

P adsorption 193
P fertilization 55
Partial least-square regression 80
Particle size fractionation 109
Pasture 200
Pesticide 219
Phosphatases 216, 285
Phosphate adsorption 311
Phosphate solubilization 37
Phosphodiesterase 320
Phosphomonoesterase 320
Phosphorus 285
Phosphorus cycling 255
Phosphotriesterase 320
Photodegradation 19
Phytase 285
Pinus halepensis 143
Plaque 297
Plasmids 132
Population density 241
Priming effect 99, 103
Proteolytic bacteria 341

Rate constant 175
Reduced tillage 13
Relative agronomic effectiveness 311
Reproduction 263
Respiration 71
Rhizobia 95
Rhizobiophage 297
Rhizobium 63, 169
Rhizobium leguminosarum 216
Rhizobium meliloti 132
Rhizobium spp. 132
Rhizobium spp. *Bradyrhizobium* spp. 297
Rhizosphere soil 37
Rice yield 37
Riparian soils 89
Root biomass 60
Root extraction 60
Root growth 7
Root length 60
Root litter 228
Root oxidase activity 245
Roots 285

Sample homogenization 60
Sclerocystis microcarpa 95
Seedling emergence 209
Selective inhibition 334
Semiarid soils 155
Senna siamea 193
Sewage sludges 175
Shrubland 155
Snails 219
Soil coring 60
Soil enzymes 7
Soil fertility 209
Soil hydrogenase 109
Soil inoculation 209
Soil microbes 302
Soil microbial activity 291
Soil microfauna 200
Soil organic matter 13
Soil polysaccharide 209
Soil protease 341
Soil quality 279
Soil respiration 42, 80
Sorghum 55
Spain 183
Sporocarps 115
Stability constants 311
Static core 260
Stratospheric ozone 19
Streptomycin 334
Structure 183
Sublethal effects 83
Subterranean clover 169
Sustainable agriculture 175
Symbiotic promoters 132
Synchronization 263

Tactic system 263
Temporal variations 137
Terbuthylazine 83
Termite 115
Trace elements 150, 216
Treculia africana 193
Trigonella foenum-graecum 228
Triphenyltetrazolium chloride (TTC) 291

Urban refuse amendments 143
UV-B radiation 19

VA mycorrhiza 249
VAM 55
VAM fungi 115
Varietal variation 245
Vesicular-arbuscular mycorrhizal fungi 95
Volatilization 237

Water content 119
Water potential stress 302
Water stability 127
Wetland rice 219
Wheat 150
Wormcasts 193

Zea mays 228
